"I build and operate systems at scale."

Summary

With over a decade of experience across individual contributor and engineering leadership roles, my work ranges from re-architecting and optimizing cloud infrastructure to driving monolith-to-microservices migrations for better scalability and performance.

Work Experience

Stealth Startup - Freelance

Indonesia, Remote

SR. CLOUD INFRASTRUCTURE ENGINEER

Jun. 2025 - Present

- Designed and managed cloud infrastructure across GCP and AWS for multiple blockchain companies.
- Built and maintained Kubernetes clusters, CI/CD pipelines, and deployment automation using GitOps.
- Developed Infrastructure as Code using Terraform, standardizing provisioning across environments.
- Advised and mentored software engineers on software design, development practices, and deployment workflows.
- Implemented cost optimization and observability across all managed infrastructures.

Stealth Startup - Contract

Indonesia, Remote

SR. DEVOPS ENGINEER

Jun. 2024 - Jan. 2025

- Built and maintained Infrastructure as Code (IaC) for Google Cloud Platform.
- Managed and monitored multiple Kubernetes clusters and virtual machines.
- Introduced and supported the adoption of OpenTelemetry for observability.
- Collaborated with the Data Team to ensure data pipeline integrity and improve performance.
- Reduced cloud infrastructure costs by approximately 30%.

PT. Sejahtera Lunaria Annua (koinworks.com)

Yogyakarta - Remote

ENGINEERING MANAGER - INFRASTRUCTURE.DEVOPS

Apr. 2023 - Mar. 2024

- Led cost optimization of 80% of Koinworks cloud infrastructure, reducing monthly bills by IDR 300M.
- Drove DevOps culture transformation across the engineering team, enabling engineers to write CI/CD pipelines and manage their own deployments.
- Introduced a documentation culture in the Infrastructure team, ensuring documentation exists for on-boarding, changes, decision-making (ADR, RFC), and runbooks.
- Drove observability adoption across Infrastructure and Software Engineering teams, migrating from Datadog to OpenTelemetry to avoid vendor lock-in.

PT. Sejahtera Lunaria Annua (koinworks.com)

Yogyakarta - Remote

ENGINEERING MANAGER - PLATFORM.TRUST

Oct 2021 - Mar 2023

- Rearchitected and rolled out a new cloud infrastructure design, migrating from VM-based to container-based deployment using GKE.
- Led migration from a monolith application to distributed, event-driven microservices, replacing Jenkins with GitLab CI and introducing RabbitMQ as a message broker.
- Built an 8-person engineering team into an autonomous unit capable of self-serving their deployment needs.
- Improved Scrum ceremony efficiency by reducing time spent from 3 hours to 1.5 hours on average.
- Introduced and led observability implementation across all services using Datadog as the central monitoring platform.

PT. Sejahtera Lunaria Annua (koinworks.com)

Yogyakarta

SENIOR SOFTWARE ENGINEER

Jan 2020 - Oct 2021

- Implemented data mining pipelines integrating multiple data sources.
- Designed, maintained, and optimized multiple private integration services.
- Developed and optimized backend services including KYC flows, event-driven RabbitMQ consumers and producers, and third-party connectors to partners and service providers.
- Set up and managed Kubernetes clusters and other services on Google Cloud Platform.
- Introduced and implemented CI/CD pipelines using GitLab CI.
- Reviewed and validated security reports related to Koinworks' ecosystem.

Various Contract Engagements

SENIOR SOFTWARE ENGINEER & SYSTEM ADMINISTRATOR

Yogyakarta

Feb. 2018 - Dec. 2019

- Led engineering teams on web applications and REST APIs for online media clients in news, lifestyle, and travel verticals.
- Developed backend API for Sistem Manajemen Kerentanan (Sepatih) and contributed missing Python SDK bindings upstream to the Tenable Security Center API.
- Set up and maintained security infrastructure including Tenable Security Center, Splunk, and implemented continuous deployment using Ansible and GitLab CI.

PT. Binokular Media Utama - www.binokular.net

SENIOR SOFTWARE ENGINEER - SYSTEM ADMINISTRATOR

Yogyakarta

Nov. 2015 - Jan. 2018

- Built and maintained several internal web applications related to media monitoring services, including a crawler engine, data input and validation platform, and a distributed web-screenshot engine.
- Re-architected and developed an AI-based system for media monitoring, covering entity extraction, sentiment analysis, and quote extraction (newstensity.com).
- Rewrote an unsupervised topic classification AI service (tirlo.id) from Scala to Python, reducing memory footprint and cutting server requirements by a third, replacing ArangoDB with MongoDB.
- Designed, deployed, and maintained a multi-master Percona XtraDB cluster, Elasticsearch cluster, and disaster recovery nodes.

PT. Sebangsa Bersama - sebangsa.com

BACKEND ENGINEER

Yogyakarta

Apr. 2014 - Oct. 2015

- Developed Sebangsa Auth using OAuth 1.0 protocol.
- Developed and maintained the Sebangsa Premium API.
- Implemented a fan-out algorithm for distributing users' posts to their followers.

Certificates

2020 **Alibaba Cloud Associate**, Alibaba Cloud

IACA01200200004655L

Presentation

Sebangsa Development Program

PRESENTER

Yogyakarta

Mar. 2015

- Presented how delayed and distributed task queues work using Python, Celery, and RabbitMQ.

Wonosobo Cyber Security Meetup

PRESENTER

Wonosobo, Central Java

Mar. 2018

- Introduced how to gain access and control Android smartphones using Metasploit Framework.

Skills

Infrastructure	Linux OS, Kubernetes, Docker, Ansible, Helm, Terraform
Cloud Platform	Google Cloud Platform (GCP), Amazon Web Services (AWS), Alibaba Cloud (Alibaba Cloud)
CI/CD	GitLab CI, GitHub Actions, ArgoCD, FluxCD, Jenkins, CloudBuild
Monitoring	Grafana, Prometheus, Datadog, OpenTelemetry
Security	HashiCorp Vault
Programming	Golang, Rust, Python, TypeScript, Bash, PHP, Solana Program Development (Anchor, Codama)
Database	SQL [PostgreSQL, MySQL], NoSQL [Redis, MongoDB, Cassandra]
Messaging	RabbitMQ, NATS
Log Management	Splunk, ELK Stack
Languages	English, Bahasa Indonesia

Education

School of Applied Science, Telkom University

ASSOCIATE DEGREE (DIPLOMA) IN COMPUTERIZED ACCOUNTING

Bandung, Indonesia

2010 - 2013
